SUBJECT INDEX

Ab initio calculations
  Electronic states of the dication NH_2^{2+} 157
Alanine
  Ion/molecule reaction and ion evaporation in atmospheric pressure spray ionization 207
Anion/molecule reactions
  Gas phase reactions of the methylsulfinyl and methyl disulfide anions 217
Aromatic hydrocarbons
  Charge-transfer reactions of fullerene dications with aromatic hydrocarbon and fullerene molecules in the gas phase R5
Atmospheric pressure spray
  Ion/molecule reaction and ion evaporation in atmospheric pressure spray ionization 207
Axialization
  Quadrupolar excitation and collisional cooling or axialization and high pressure trapping of ions in Fourier transform ion cyclotron resonance mass spectrometry 71

Cell design
  Improvement of the electric field in the cylindrical trapped-ion cell 179
Charge measurement
  Investigation of surface charging of insulating materials due to secondary particle emission using a new dual beam instrument 129
Charge transfer
  Charge-transfer reactions of fullerene dications with aromatic hydrocarbon and fullerene molecules in the gas phase R5
Collisional cooling
  Quadrupolar excitation and collisional cooling for axialization and high pressure trapping of ions in Fourier transform ion cyclotron resonance mass spectrometry 71
Collisions
  Collision-mediated axial ejection of radially excited ions as a mass dependent ion loss mechanism in Fourier transform ion cyclotron resonance mass spectrometry 103

Deprotonation mechanism
  Concerning sterical hindrance to deprotonation of gaseous polyalkylbenzenium ions R1
Dications
  Charge-transfer reactions of fullerene dications with aromatic hydrocarbon and fullerene molecules in the gas phase R5
  Double-charge-transfer spectrometry and the measurement of electronic-state energies of doubly charged ions 1
  Electronic states of the dication NH_2^{2+} 157

Electric field effects
  Improvement of the electric field in the cylindrical trapped-ion cell 179
Electronic states
  Electronic states of the dication NH_2^{2+} 157
Electronic-state energies
  Double-charge-transfer spectrometry and the measurement of electronic-state energies of doubly charged ions 1
Ethyl formate
  Unimolecular dissociation of energy-selected ethyl formate ions 85
Excite profiles
  Collision-mediated axial ejection of radially excited ions as a mass dependent ion loss mechanism in Fourier transform ion cyclotron resonance mass spectrometry 103

Focussing properties
The influence of small imperfections in inhomogeneous magnetic sector fields on ion trajectories and focussing properties 65
Fragmentation
Unimolecular dissociation of energy-selected ethyl formate ions 85
Fringing fields
The influence of the extended fringing fields of an electrostatic ion mirror on ion trajectories and flight times 231
FT-ICR MS
Collision-mediated axial ejection of radially excited ions as a mass dependent ion loss mechanism in Fourier transform ion cyclotron resonance mass spectrometry 103
Theoretical mass and energy upper limits for thermal ions in Fourier transform ion cyclotron resonance mass spectrometry 193
Fullerenes
Charge-transfer reactions of fullerene dications with aromatic hydrocarbon and fullerene molecules in the gas phase R5

Gas chromatography
Ion band multicomponent resolution method 117
Geochemistry
Microanalysis of oxygen isotopes in insulators by secondary ion mass spectrometry 45

Insulator charging
Investigation of surface charging of insulating materials due to secondary particle emission using a new dual beam instrument 129
Ion evaporation
Ion/molecule reaction and ion evaporation in atmospheric pressure spray ionization 207
Ion flight times
The influences of the extended fringing fields of an electrostatic ion mirror on ion trajectories and flight times 231
Ion mirror
The influences of the extended fringing fields of an electrostatic ion mirror on ion trajectories and flight times 231
Ion optics
Investigation of surface charging of insulating materials due to secondary particle emission using a new dual beam instrument 129
Ion trajectories
The influence of small imperfections in inhomogeneous magnetic sector fields on ion trajectories and focussing properties 65
The influences of the extended fringing fields of an electrostatic ion mirror on ion trajectories and flight times 231
Ion trap
Improvement of electric field in the cylindrical trapped-ion cell 179
Theoretical mass and energy upper limits for thermal ions in Fourier transform ion cyclotron resonance mass spectrometry 193
Ion trapping
Quadrupolar excitation and collisional cooling for axialization and high pressure trapping of ions in Fourier transform ion cyclotron resonance mass spectrometry 71
Ion/effect reactions
Concerning sterical hindrance to deprotonation of gaseous polyalkylbenzenium ions R1
Ion/molecule reactions
Ion/molecule reaction and ion evaporation in atmospheric pressure spray ionization 207
Isotopic analysis
Isotopic analysis of rare earth elements by total vaporization of samples in thermal ionization mass spectrometry 163

Least squares
Ion band multicomponent resolution method 117

Magnetic sector fields

The influence of small imperfections in inhomogeneous magnetic sector fields on ion trajectories and focussing properties 65
Mass discrimination
Collision-mediated axial ejection of radially excited ions as a mass dependent ion loss mechanism in Fourier transform ion cyclotron resonance mass spectrometry 103
Mass spectrometry
Ion band multicomponent resolution method 117
Methyl disulfide anion
Gas phase reactions of the methylsulfinyl and methyl disulfide anions 217
Methylsulfinyl anion
Gas phase reactions of the methylsulfinyl and methyl disulfide anions 217
Multimixture separation
Ion band multicomponent resolution method 117

NH_2^{2+}
Electronic states of the dication NH_2^{2+} 157

Oxygen isotope microanalysis
Microanalysis of oxygen isotopes in insulators by secondary ion mass spectrometry 45

Particle emission
Investigation of surface charging of insulating materials due to secondary particle emission using a new dual beam instrument 129
Polyalkylbenzene ions
Concerning sterical hindrance to deprotonation of gaseous polyalkylbenzenium ions R1

Rare earth elements
Isotopic analysis of rare earth elements by total vaporization of samples in thermal ionization mass spectrometry 163

SIMS
Investigation of surface charging of insulating materials due to secondary particle emission using a new dual beam instrument 129
Microanalysis of oxygen isotopes in insulators by secondary ion mass spectrometry 45
Single-ion method
Ion band multicomponent resolution method 117
Steric effects
Concerning sterical hindrance to deprotonation of gaseous polyalkylbenzenium ions R1
Sucrose
Ion/molecule reaction and ion evaporation in atmospheric pressure spray ionization 207

Theoretical analysis
Improvement of the electric field in the cylindrical trapped-ion cell 179
Thermal ionization
Isotopic analysis of rare earth elements by total vaporization of samples in thermal ionization mass spectrometry 163
TPEPICO
Unimolecular dissociation of energy-selected ethyl formate ions 85

Unimolecular dissociation
Unimolecular dissociation of energy-selected ethyl formate ions 85

z Axis ejection
Collision-mediated axial ejection of radially excited ions as a mass dependent ion loss mechanism in Fourier transform ion cyclotron resonance mass spectrometry 103
